Update on High Lead in Flint MDT v2 03-20-15.docx

Sorry, I forgot to include a note from Mr. Glasgow about a video [Ex. 6 - Personal Privacy] showed him where [Ex. 6 - Personal Privacy] son had a full body rash 10 minutes after bathing, so I added that to the revised summary (attached).

Subject: Update on Flint

Good morning folks,

Yesterday I spoke with [Ex. 6 - Personal Privacy] regarding the high lead results at [Ex. 6 - Personal Privacy] home, and this morning I spoke with Mike Glasgow from the Flint water department. Attached are my notes from those conversations. I did not discuss anything on Legionella with either person as I thought it best to let more knowledgeable folks handle this, but they are flushing water mains so this might be something that EPA and DEQ folks should look into.
